Professional Summary

Java-focused full-stack developer with experience in Spring Boot, Spring Security, JPA, JWT, and SQL. Experienced in building secure REST APIs and integrating them with React-based frontends.

Around one year of professional experience working on Java enterprise applications.

Education

Undergraduate: Kantipur College of Management and Information Technology (KCMIT), Bachelor of computer Applications (BCA)

Kathmandu, Nepal Jan 2022 – Jan 2026

- Affiliated with Tribhuvan University (TU)
- Focused on Java programming, databases, web technologies, and software engineering

+2 Higher Secondary Education Board, Management (Computer Science)

Ilam, Nepal Jan 2018 – Jan 2020

- Computer Science specialization
- Strong foundation in programming and problem solving

Experience

COSMOTECH International Pvt. Ltd., Full stack Developer

Kathmandu, Nepal Nov 2024 – Apr 2026 1 year 5 month

- Developed Java backend services using Spring Boot
- Implemented JWT-based authentication and authorization
- Designed REST APIs and integrated them with React frontend
- Worked with JPA, MySQL, and Redis for data persistence and caching

Projects

Lions International Management System

Web-based system for managing Lions Club social welfare activities

- Spring Boot backend with JPA and MySQL

- Role-based access control using JWT
- React frontend integration

Hamro Awaz – Complaints Issue Management System

Complaint management platform with web and mobile application support

- Spring Boot backend with SQL database
- Redis used for caching complaint data
- MVC architecture with admin dashboard

Hospital Management System – Console Application

Java console-based hospital management system

- Managed doctor and patient records and appointments
- Implemented object-oriented programming principle

Futsal Booking System

Web and mobile application for booking futsal ground schedules

- Spring Boot backend and MySQL database
- User authentication and booking workflow

SKILLS SUMMARY

Full Stack Web Development

- **Backend:** Java, Spring Boot, Spring Security, JPA, JWT, Redis, REST APIs
- **Frontend:** React, JavaScript, HTML, CSS, Tailwind CSS
- **Databases:** MySQL, MongoDB
- **Tools Practices:** Git, GitHub, Postman, Docker, GitHub Actions

Team Building

- Comfortable working in teams, sharing ideas, and contributing to group success
- Support a positive team environment by being reliable, open to feedback, and solution-focused

Problem Solving

- Break down complex requirements into manageable backend and frontend tasks using **MVC architecture**
- Continuously research and apply better approaches to improve code quality and system scalability
